INTRO

Sql

- the de facto standard language of relational database management systems for creating and querying relational databases.
- SQL has been accepted as a U.S. standard by the American National Standards Institute (ANSI) and is a Federal Information Processing Standard (FIPS). It is also an international standard recognized by the International Organization for Standardization (ISO). ANSI has accredited the International Committee for Information Technology Standards (INCITS) as a standards development organization
    - Meaning it is very accredited
